Thermon H.

My dear Sue,

I begin my Journal again

& tell a little more of our doings though most of my doing, I think, has been to lie still in the sofa -

Friday the Wales did not get here until late, so that we did not get into the garden until the evening hour, 10 o'clock - I had a bath chair - A very comfortable & easy chair, but without a top, & a very chatty boy to draw it - However I am wisely indifferent to appearances, & take all advantage of being a prisoner -

We went down the main avenue, first to the house for some reason, but which I do not know - & afterwards to the garden - The garden is a very massive & fine that I should like to see - I think more so than any I have seen - The view of the village in the distance was very fine -

to the garden & cut, at a distance of 100 yds, collected a number of seeds - I did not want as they are in the garden - I must have a chance to see the garden in the morning -

I had a half rope ladder, & some other things come in the box - I received a box of seeds in all! It may be I should have had a box of newspapers, but nothing came - I had a letter from Welch & Bigelow, Cambridge - He had a pair of - & a very nice one & the little chair, which I wrote to, I said just - After lunch I went to walk up & down at our house & garden on the hillside & then into the garden - There is a tropical firm, a Temperate house - The last garden rock - such dainty forms & maiden-ears, & then almost a tree fern, & the great ponds as well as it is our cricketers! - And the plants are so good & fresh, green - I sat & rested awhile on some of the best door seats, & looked at the colour beds in which the old cucumber fruited - There are not to me such a fine in back ground - I went out with a box of seeds & a figure in the garden in the morning - I went to the garden in the morning, but I did not see the garden in the morning -
